Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bryan #3,968,857. Bryan discloses a ladder assembly comprised of ladder 12, steps 20, door 10, the front portion/second door panel of which 24 is hingedly attached to the ladder, a handle (unnumbered), and a lock assembly 60, located near the handle on the second door panel. Bryan fails to disclose the handle located at the top portion of the door.

The location of the handle is an obvious design choice that one of ordinary skill in the art would be expected to determine through routine experimentation. Therefore, to one of ordinary skill in the art, it would have been obvious to locate the handle near a top portion of the door, while producing no new and unexpected results.

Allowable Subject Matter

Claims 2 and 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claim 2 is the inclusion of the handle being an upwardly extending aperture of the door. For claim 4, it is the inclusion of biasing means, i.e., a spring member connected to the door. For claim 5 it is the

Art Unit: 3634

inclusion of lock biasing means to bias the lock operator into a lock position. The prior art of record fails to teach or suggest the claimed feature absent the applicant's own disclosure.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spurling #4,579,197, and Ludlow are cited to teach ladder shield/door arrangements.
